

POTENTIAL TAX BENEFITS FOR FARMERS INSTALLING CULVERTS

Following the rains and recent damage to farms in the North Island, farmers should be aware that there may be helpful tax deductions available to them when installing culverts on their farms as part of repairing land damage or even for certain land improvement activities.

Type of expenditure	Deduction available
The repair of flood or erosion damage to land	In full in year of expenditure Income Tax Act 2007, Sec D01
Drainage of swamps or low-lying lands	Usually non-deductible, but farms are allowed a unique tax concession spread over a number of years. Income Tax Act 2007, Schedule 20
Construction of stream diversion channels, or other improvements for the purpose of conserving, conveying water for use on the land, or for preventing or combating soil erosion.	As above
All culverts installed as part of a business activity	Depreciation can be claimed at the applicable rates
